

# ENVIRONMENTAL RESPONSIBILITY POLICY

one of the key pillars of our business is to work on continuously improving our environmentally sustainable practices throughout our business operations, in order to reduce our impact on the environment.

## OUR POLICIES:

### Employees

Encourage and educate employees on the importance of environmental sustainability and reducing waste and consumption

Impose and internal ban on consumption of single-use plastics during work hours.

### Supply Chain

Engage with our suppliers to consider their environmental impact and how to reduce any single-use plastics involved in their packaging and processing.

Partner with Muuse to provide alternatives to single-use packaging in-store.

Seek out sustainability-forward companies such as TreeDots to be included in our Supply Chain.

### Customers

Actively discourage the use of single-use packaging such as paperbags, and encourage customers to re-use and reduce use of such.

Obtain ready-to-sell drinks bottled in glass or canned, effectively omitting the use of straws, cups and ice.

Encourage and incentivise customers to bring their own bowls for takeaway.

### Waste Management

Partner with organisations such as JustDabao to reduce cooked food wastage.

Utilize platforms such as Olio to redistribute excess inventory.
